

Nominal size DN 100 to DN 1000

for dowelling onto an embankment end section
Slope e.g. 1:1 or 2:3

- Design: TESACO design, to DIN 19569-4
incl. welded-on sleeves for drill guidance and for holding the anchor rods, which allows horizontal drilling on a sloping embankment end section.
- Max. static pressure: 6.0 mWC
- Material: Flange in stainless steel 1.4301 or 1.4571
Flap bracket in stainless steel 1.4301 or 1.4571
Wall sealing in silicone (by others)
Flexible flap cover in EPDM
Fixing screws in stainless steel A4
- Corrosion protection: stainless steel pickled and passivated
